Ensure Online Student Safety and CIPA Compliance

Kids are online all the time — whether it's a smartphone or laptop computer. But they're not always under close supervision online. As educators, you want to ensure your students have the foundational skills to navigate the internet in a safe and responsible way. That includes communicating effectively online, recognizing and responding appropriately to cyberbullying, and understanding online privacy concerns.

OVERVIEW

The Children's Internet Protection Act, or CIPA, requires schools to educate students on cyberbullying awareness and response, and to teach appropriate online behavior — including how to interact with other individuals on social networking websites and in chat rooms. EasyTech's K-12 digital literacy curriculum offers dozens of learning experiences across grade levels, combined with an easy reporting feature, to ensure districts meet CIPA compliance and can qualify for E-Rate funding.

Simple, Easy Way to Meet CIPA Requirements to Qualify for E-Rate

DIGITAL CITIZENSHIP AND ONLINE SAFETY

Lessons in K-12 Digital Citizenship provide information literacy skills, effective communication techniques for online learning environments, and methods to protect your privacy online — from creating a strong password to knowing which information should be shared over the internet.

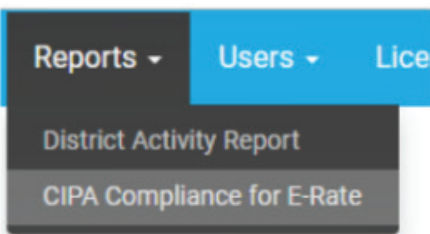

RECOGNIZING & RESPONDING TO CYBERBULLYING

Age appropriate cyberbullying lessons help students from pre-k through high school learn to recognize cyberbullying and what actions to take when they see or experience cyberbullying themselves.

INCLUDED IN THE TECH QUEST PATHWAY

The lessons that meet CIPA requirements are automatically included in the Tech Quest pathway. With Tech Quest, students work their way through auto-scored, gamified content designed specifically for their grade level, earning stars and rewards along the way. Tech Quest ensures students start the year knowing online safety essentials.

EASY REPORTING FOR CIPA AND E-RATE

A specialized CIPA report makes it easy for districts to pull data that shows their students are working through the required curriculum to meet CIPA compliance and qualify for E-Rate.
